

Your new Touchstone Living ENERGY STAR home.

To earn the ENERGY STAR label, your home has undergone a rigorous process of third-party testing and verification. It has had to meet strict energy efficiency requirements. The label ensures your home is better built from the ground up delivering better durability and a superior level of quality.

Compared with standard and used homes, ENERGY STAR certified homes use substantially less energy. Better energy efficiency and performance means lower utility and maintenance costs. Your home will be more comfortable, more energy efficient and you'll save money. An ENERGY STAR rated home is better for the planet.
