# OUR GREEN BUILD INITIATIVE

At Black Oak Homes, we understand that it's not just about what your home looks like, but also about how it operates.

Our mission is to provide an experience of exceptional craftsmanship, extraordinary collaboration and innovation within the building industry but doing so in a way that can lessen the inherent impacts building has on our environment.

By building green, we hope to give our clients the ability to not only enjoy the homes we construct for years to come, but also the peace of mind knowing that they are not contributing to the depletion of our environment or their bank account.

## Energy Efficient & Environmentally Friendly

- ◇ 96.6% efficiency furnace
- ◇ Nest smart thermostat
